SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Enclosed is Form PTO-1449, Information Disclosure Citation
In An Application.

The following Patents and/or Publications are submitted to
comply with the duty of disclosure under CFR 1.97-1.99 and
37 CFR 1.56

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, on November 27, 2004.

Stephen B. Ackerman, Reg. # 37761

Signature/Date S. S. B. 11/22/04

U.S. Patent 4,633,503 to Hinman, "Video Zoom Processor," discloses a video zoom processor which digitally processes video imagery information in a simultaneous two-dimensional format.

U.S. Patent Application Publication US 2002/0154123 A1 to Harasimiuk, "Image Scaling," discloses a method and a system for scaling a digital source image consisting of a grid of X by Y pixels into a target image of a different resolution.

U.S. Patent Application Publication US 2001/0020950 A1 to Shimizu et al., "Image Conversion Method, Image Processing Apparatus, and Image Display Apparatus," discusses obtaining a clear scaled image without impairing the rough shape of fonts or the like, on a graphics screen that is handled by an information display device such as an LCD panel or a projector, and that includes a lot of stepped edges like thin lines.

U.S. Patent 6,546,157 to Okuno et al., "Number-of-Pixels Conversion Apparatus and Display Apparatus Using the Same," discusses a number-of-pixels conversion apparatus for converting the number of pixels on an original image or a display apparatus using the same.

U.S. Patent 6,091,513 to Ishihara et al., "Apparatus and Method for Converting Image Size and Recording Medium Recording Image Size Converting Program Therein and Capable of Being Read by Computer," discusses a process discriminating unit which allows an optimum converting process among a first magnification processing unit, a second magnification processing unit, a first reduction processing unit, a second reduction processing unit, and a third reduction processing unit to be executed on the basis of a conversion magnification (K), a resolution (D), and an image size.

U.S. Patent 4,661,987 to Anderson et al., "Video Processor," discloses a method and processor for varying the size of a digitized video image in substantially two video frame times by transforming successive lines of the image along one axis and then transforming successive lines of the image along the other axis.

Sincerely,

Stephen B. Ackerman,
Reg. No. 37761

EXAMINER: Initial if citation considered, whether or not citation is in conformance with MPEP § 609; Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to the applicant.
